Contact Information

We did not find an address in your resume or the address is incomplete. Recruiters use your address to validate your location for job matches.

You provided your email. Recruiters use your email to contact you for job matches.

You provided your phone number.

Summary

We found a summary section on your resume. Good job! The summary provides a quick overview of the candidate's qualifications, helping recruiters and hiring managers promptly grasp the value the candidate can offer in the position.

Section Headings

We found the education section in your resume.

We found the work experience section in your resume.

We found work history in your resume.

Job Title Match

The job title "Robotics Engineer" from the job description was not found in your resume. We recommend having the exact title of the job for which you're applying in your resume. This ensures you'll be found when a recruiter searches by job title. If you haven't held this position before, include it as part of your summary statement.

Date Formatting

The dates in your work experience section are properly formatted.

Education Match

The job description does not list required or preferred education, but your education is noted.

Hard skills

Hard skills enable you to perform job-specific duties and responsibilities. You can learn hard skills in the classroom, training courses, and on the job. These skills are typically focused on teachable tasks and measurable abilities such as the use of tools, equipment, or software. Hard skills have a high impact on your match score.

Tip: Match the skills in your resume to the exact spelling in the job description. Prioritize skills that appear most frequently in the job description.

FAQs

What are the essential sections in a resume?

It's important to include those three required sections — Experience, Education, and Skills in your resume. Ensure that they are properly formatted and every single element is clearly outlined (degree, institution, education dates, company names, job titles, employment dates, bullets with responsibilities and achievements, and skills).

Repetition

Avoid repeating action verbs and phrases on your resume

4

1 ISSUE FOUND

Change repetitive action verbs

We found that you overused 2 action verbs on your resume, specifically Developed (4 times) and Designed (3 times). Using the same action verb more than 2 times on your resume reduces your resume's impact since it makes it harder for your achievements to stand out.

Review the following words and, where it makes sense, try to replace them with unique action verbs - this shows hiring managers that you have a range of different skill sets.

1. Developed (4 times)

Here are the relevant lines from your resume:

Developed an autonomous navigation stack using ROS2, Nav2, Visual SLAM using RTAB-Map and

Developed IMU-enhanced tracking system using complementary filter fusion to improve camera p

Developed persona-based PDF analysis system with RAG-style retrieval, intelligent section rankin

Developed Android endless runner with touch-based controls and procedurally generated jungle

2. Designed (3 times)

Here are the relevant lines from your resume:

Designed a mission control dashboard using PyQt, providing real-time data visualization and para

Designed parallelized GitLab CI/CD pipelines integrating Playwright and Cypress

EDUCATION

Vellore Institute of Technology | Vellore, India

Bachelor of Technology in Computer Science and Engineering (Specialization: IoT)

Gems International School | Gurugram, India

Central Board of Secondary Education (CBSE)

CGPA: 8.37

Aug. 2023 - July 2027

Class 10: 89.3% | Class 12: 76.4%

Nov. 2016 - April 2023

TECHNICAL SKILLS

Development: Python, C/C++, HTML/CSS, JavaScript, Bash, SQL, MongoDB, Verilog, Java, React, Node.js

Robotics: ROS2, Nav2, MoveIt2, RTAB-Map, Kalman Filtering

Libraries: OpenCV, MediaPipe, Intel RealSense, PyTorch, TensorFlow, scikit-learn, Flask

DevOps: Linux, Docker, Git/GitHub, GitLab CI/CD, AWS

WORK EXPERIENCE

Team Vyadh (Marsian Rover Team)

Autonomous Systems Developer

April 2024 - Present

Vellore, India

Developed an autonomous navigation stack using ROS2, Nav2, Visual SLAM using RTAB-Map and Intel RealSense to build elevation maps, enabling real-time path planning and obstacle avoidance.

Built multithreaded computer vision pipeline with CUDA acceleration, YOLOv8 object detection, ArUco/AprilTag marker recognition and achieved a 4x performance increase using OpenCV and Linux V4L2 optimizations.

Prototyped Micro-RS based solutions on ESP32 for sensor acquisition and actuator control and Configured PID control systems for precise robotic mobility with Extended Kalman Filter sensor fusion.

Designed a mission control dashboard using PyQt, providing real-time data visualization and parameter tuning and integrated Finite State Machine controllers for mission planning.

Wissen Team Engineering Solutions

Software Automation Intern

May 2025 - July 2025

Pune, India

Built BDD automation framework with Python, Behave, and pytest.

Implemented real-time 3D surface reconstruction using KinectFusion algorithm with Intel RealSense D455.

Automated data validation using pandas/NumPy and implemented Git hooks for code quality enforcement.

PROJECTS

HapsOS | C, ARM Assembly

2026

Bare-metal RTOS from scratch implementing preemptive scheduler, context switching, and synchronization.

Featuring interrupt handling, timer management, and hardware abstraction layer with direct register manipulation.

3D Reconstruction with IMU-Enhanced KinectFusion | C++, OpenCV, Intel RealSense SDK

2025

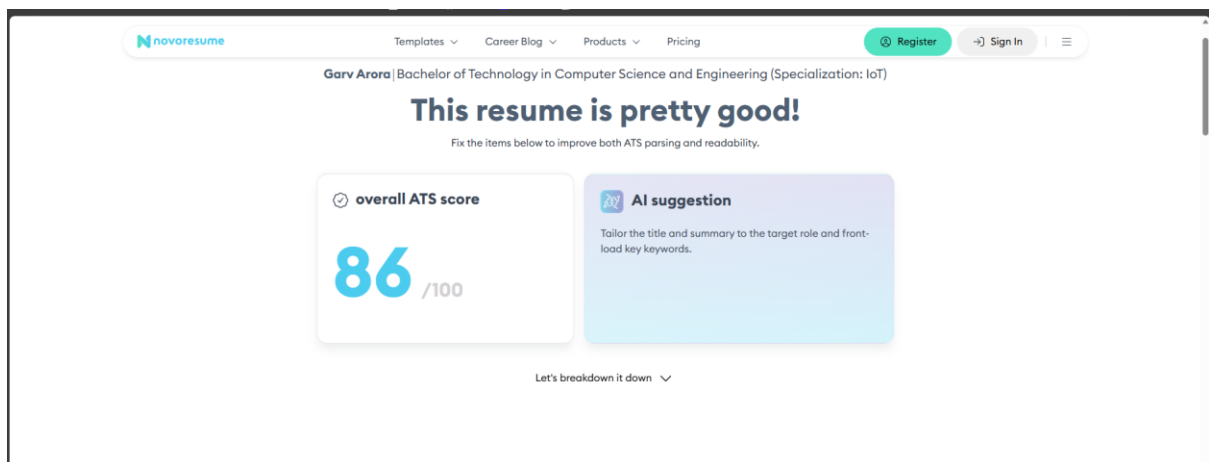

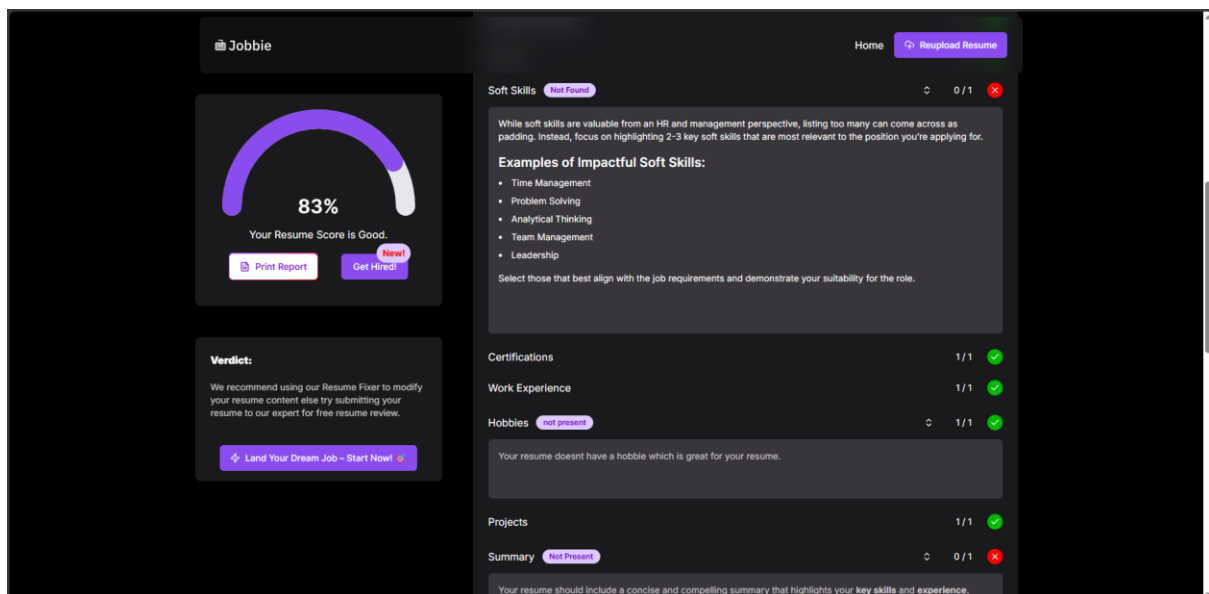

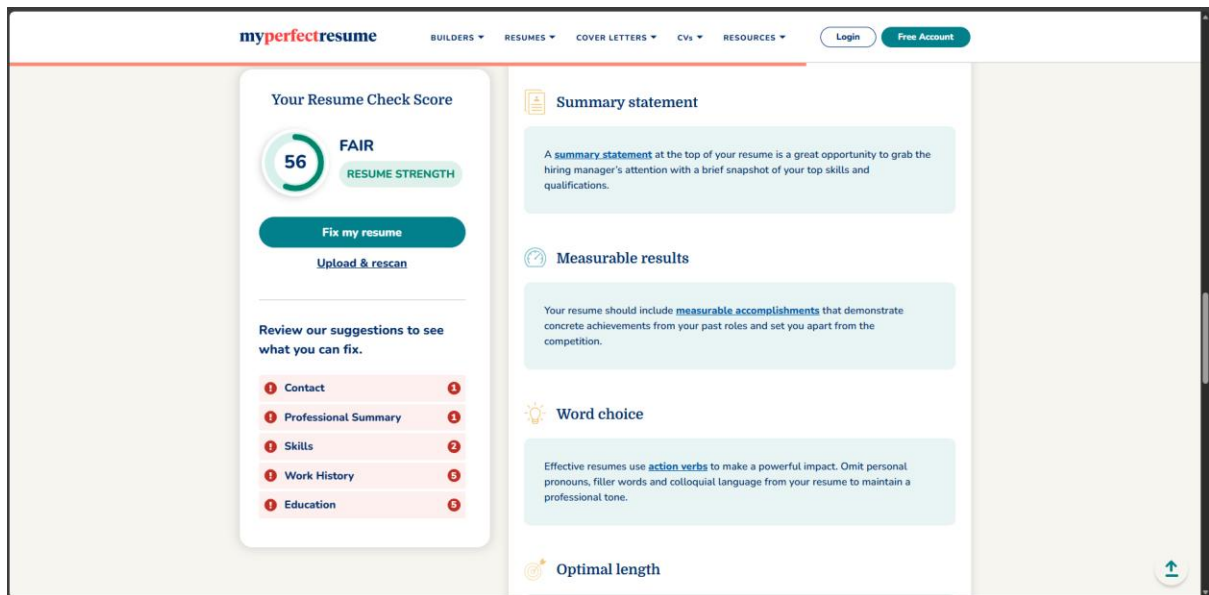

Implemented real-time 3D surface reconstruction using KinectFusion algorithm with Intel RealSense D455.

Developed IMU-enhanced tracking system using complementary filter fusion to improve camera pose estimation robustness during rapid motion and prevent tracking failures.

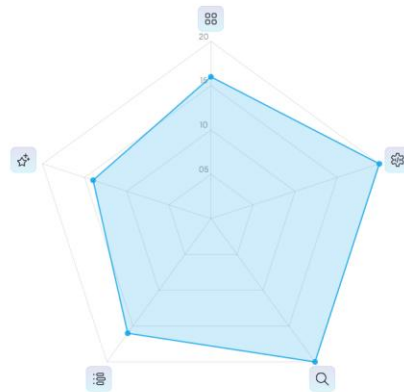

PDF Summarizer | Python, PyMuPDF, BuggingPaw Transformers, Docker

Developed persona-based PDF analysis systems with RAG-style retrieval, intelligent section ranking, and multi-document processing.

Technical content-related roles: Docker, PyTorch, TensorFlow models for content recommendation.

## Key Areas Breakdown

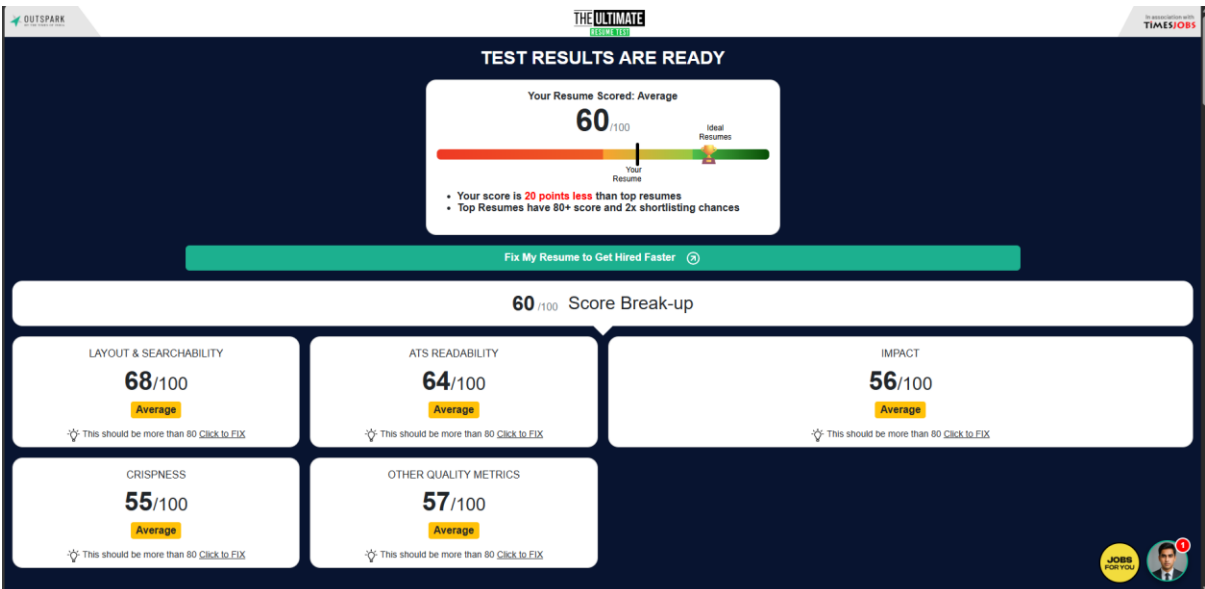

**16/20** **section organization**  
Sections are clear and well separated—easy to navigate.

**20/20** **technical elements**  
No technical red flags detected—your file should parse reliably.

**20/20** **keywords & relevance**  
Your terminology aligns well with the target role and industry.

**16/20** **format & structure**  
Overall structure is ATS-friendly and easy to parse.

**14/20** **content quality**  
Your achievements are clearly presented with measurable impact—great job.

### 1. Layout & Searchability

**68/100** AVERAGE

**Organization & Structure:** Evaluates how well your resume is organized, including the order of sections, and if it follows a logical flow that's easy for both humans and ATS to navigate.

**Visual Appeal & Accessibility:** Looks at the overall visual presentation, such as font choice, spacing, and whether the layout makes it easy to quickly find important information.

#### Feedback

The resume exhibits a well-organized layout, ensuring that all sections are easily locatable due to bold headings. The chronological order of sections is correct, but the lack of a personal statement or profile summary is a minor oversight.

#### Important points-

**Essential Sections:** The education and work experience sections are prominently displayed and chronologically accurate, which enhances readability. However, adding a brief summary at the beginning could provide a quick glance at the candidate's strengths and goals.

**Readability:** The contact information at the top strongly aids readability and provides immediate access to key details. Nonetheless, incorporating a summary section would improve initial readability by highlighting key skills and experiences upfront.

[Craft Your Winning Resumes Now](#)

### 2. Impact

**56/100** AVERAGE

**Effectiveness of Content:** Assesses how well your resume demonstrates your achievements, skills, and experience. Focuses on the use of quantifiable metrics and specific examples to showcase your impact in previous roles.

**Action-Oriented Language:** Reviews the use of strong verbs and accomplishment-oriented language that effectively highlights your contributions and results in past positions.

#### Feedback

While the resume uses active language in the job descriptions, it lacks quantified achievements. Including metrics or results in the experience section could significantly bolster its persuasiveness.

#### Important points-

**Bullet Points:** The use of bullet points is adequate, helping to present information in digestible chunks. Yet, the bullet points could be further refined to emphasize key points more succinctly.

**Quantifying Impact:** The current bullet points describe tasks and responsibilities, but incorporating specific achievements or metrics would create a more compelling narrative. Adding quantifiable results, like percentages or savings, is recommended.

**Repetition Avoidance:** There is minimal repetition of terms, which helps maintain a fresh narrative throughout the document. A varied vocabulary ensures a compelling read, though further diversification could enhance impact.

**Weak Action Verbs:** The document largely employs strong, active verbs; however, refining some verbs to be more impactful could further strengthen perceptions of expertise. Ensuring every verb conveys strong action will enhance engagement.

**Accomplishment Language:** There's a lack of result-oriented language which could emphasize past accomplishments comparably. Redirecting certain bullet points to focus more on outcomes rather than tasks is advisable.

**Spell Check:** The resume appears free from spelling errors, contributing to a professional presentation. Regular spell checks are encouraged to maintain this standard.

### 3. Crispness

**55**/100 **AVERAGE**

**Clarity & Focus:** Analyzes the resume for clear and focused content, ensuring that it is targeted towards your desired role and industry, without being overly wordy or vague.

The resume tends to be slightly technical with long detail-oriented sentences, impacting concise delivery. It would benefit from trimming down complex expressions for better brevity.

**Resume Length:** The resume has an appropriate length for an early career professional, spanning just over a page. However, refining content to fit more concisely into one page could enhance crispness.

**Bullet Points Count:** The number of bullet points is manageable, yet the heavy technical focus suggests a more concise presentation could elevate clarity and impact. Focusing on key achievements might alleviate this clutter.

**Bullet Point Length:** Some bullet points are lengthy, disrupting flow and readability. Shortening and simplifying sentences will improve clarity and engagement for the reader.

**Filler Words:** There are minimal filler words present, but a consistent review to eliminate unnecessary words will aid in keeping the content sharp. Simplifying technical jargon could also be beneficial.

**57** /100 **AVERAGE**

**Voice & Tone:** Evaluates the consistency in voice and tone throughout the resume, including the use of active voice and avoidance of personal pronouns, which contribute to a strong professional presentation.

The resume avoids common buzzwords or clichés, focusing instead on technical competencies. Continuing to build on these competencies while avoiding overuse of trendy terms will uphold its integrity.

**Buzzwords/Cliches:** The document does not overly rely on buzzwords or clichés, preserving authenticity in its tone. It's advisable to continue emphasizing specific skills and experiences over generalized terms.

**Dates Formatting:** Date formats are mostly consistent and correctly positioned, which aids in maintaining an orderly timeline. Ensuring that all dates match a singular format will further unify the document.

**Personal Pronouns Usage:** The resume effectively avoids personal pronouns, maintaining an appropriate professional tone. Adherence to this style is encouraged to preserve the formal structure.

**Active Voice:** Active voice predominates throughout the resume, affording clarity and directness in communication of past tasks. Maintaining this stylistic approach will strengthen the resume's message.

## 5. ATS Readability

64/100 AVERAGE

**Compatibility with ATS Systems:** Reviews how well your resume is likely to be parsed and understood by Applicant Tracking Systems, based on formatting and organization.

**Keyword Optimization:** Examines the use of industry-relevant keywords and phrases that are crucial for passing through ATS filters and matching job descriptions.

Key information is well presented and ATS systems should be able to read and process the document effectively. Enhancing keyword optimization to align more closely with job descriptions could increase ATS compatibility.

Your resume scored a **B**

You're on the right track, but your resume could definitely use some tuning up. We recommend looking over **our analysis below** and seeing what you have to work on in order to take your resume to the next level.
